**DISCLAIMER**

All product specifications and technical descriptions, recommendations and other information provided in this drawing, are given as general guidance and advice, and are to be read in conjunction with Sayfa Group installation instructions and any other data available and applicable to each particular standard product or system. Use of such data is however the User's sole responsibility, taking into account the intended application and actual conditions existing on the particular worksite. Consequent selection of the right product for any particular use, remains the User's ultimate responsibility.

## Typical Layout

### NOTES:

- For a straight line system - the shock absorber can be installed on either end of the static line
- Static Line with corner - the shock absorber must be installed on the shorter side of the static line.
- The Tension Indicator allows the line to be tensioned between 70 - 95kg. The disc will be able to turn once correct tension is accomplished.
