

ZERO RETRACTABLE FALL ARRESTER

HR 026

EN 360, AS/NZS 1891.3 & 4

The retractable fall arrester is a device to prevent falls from height. With a rugged case, yet lightweight and compact, it includes an in-built auto brake and energy absorbing device. With a swivel function snap hook and a range of cable lengths available, the HR 026 can be used for many applications.

- Working cable, 4mm galvanised steel wire rope
- Cable retractor with built-in brake and energy absorber
- Maximum working load - 140kg
- Maximum admissible deflection of the cable from the vertical axis - 40°
- Top connecting swivel link for attaching device to anchor point
- Snap hook with swivel function
- Carrying handle for transportation
- Device requires annual recertification

Length Options 6m - HR 026.16, 10m - HR026.10, 15m - HR026.15
